Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

How might we create a secure and user-friendly stock trading platform that helps beginner investors buy, sell and track stocks efficiently?

Key rules of brainstorming

To run an smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

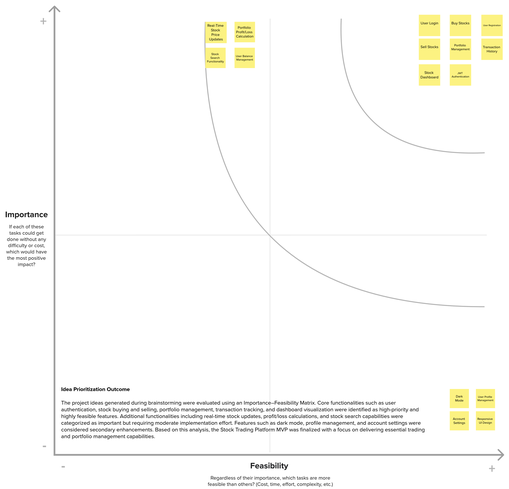
4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

TIP
Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H key** on the keyboard.



Idea Prioritization Outcome

The project ideas generated during brainstorming were evaluated using an Importance–Feasibility Matrix. Core functionalities such as user authentication, stock buying and selling, portfolio management, transaction tracking, and dashboard visualization were identified as high-priority and highly feasible features. Additional functionalities including real-time stock updates, profit/loss calculations, and stock search capabilities were categorized as important but requiring moderate implementation effort. Features such as dark mode, profile management, and account settings were considered secondary enhancements. Based on this analysis, the Stock Trading Platform MVP was finalized with a focus on delivering essential trading and portfolio management capabilities.
