

I am

Beginner
Stock Market
Investor

Retail
Investor

Working
Professional

College
Student
Interested in
Investing

First-Time
Trader

Long-Term
Investor

Part-Time
Trader

Mobile App
User

I'm trying to

Buy stocks
online

Sell stocks
easily

Track
portfolio
performance

Monitor
transaction
history

Analyze stock
prices

Manage
investments
efficiently

Check profit
and loss

Make
informed
investment
decisions

But

Trading
platforms
are complex

Interfaces
are difficult
to navigate

Financial
terms are
confusing

Portfolio
information
is scattered

Stock
tracking
takes time

Multiple
applications
are required

Real-time
information
is hard to
access

Investment
management
is not
centralized

Because

Existing apps
focus on
advanced
traders

Too many
features
overwhelm
beginners

Data is
distributed
across
multiple
screens

Learning
investment
concepts
takes time

User
experience is
not beginner-
friendly

Investors
lack a unified
dashboard

Market
information
changes
rapidly

Managing
investments
manually is
inefficient

Sai keerthi Miryala

Which makes me feel

Confused

Frustrated

Overwhelme
d

Less
confident

Hesitant to
invest

Inefficient

Time
constrained

Unsure
about
decisions
