

Project Design Phase
Proposed Solution Template

Date	15 February 2026
Team ID	
Project Name	SHOPEZ : E-commerce Application
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Beginner investors often find existing stock trading platforms difficult to use due to complex interfaces, lack of portfolio visibility, and scattered investment information. This creates challenges in managing investments and making informed trading decisions.
2.	Idea / Solution description	The proposed solution is a MERN Stack-based Stock Trading Platform that enables users to register, login, buy stocks, sell stocks, manage portfolios, view transaction history, and track profit/loss through a centralized and user-friendly dashboard.
3.	Novelty / Uniqueness	Unlike many existing platforms, the proposed system focuses on simplicity, beginner-friendly navigation, integrated portfolio tracking, real-time stock information, and a streamlined trading experience within a single application.
4.	Social Impact / Customer Satisfaction	The platform promotes financial literacy and encourages informed investing. Users can easily monitor their investments, understand portfolio performance, and make better financial decisions, leading to improved customer satisfaction.
5.	Business Model (Revenue Model)	The platform can adopt a freemium business model where basic trading features are free while premium features such as advanced analytics, personalized investment

		recommendations, and portfolio insights are offered through subscription plans.
6.	Scalability of the Solution	The MERN architecture allows easy scalability through cloud deployment, database expansion, API integration, and support for a growing number of users. Future enhancements can include real-time market feeds, AI-based recommendations, and mobile applications.
